## Mission

Debt Service provides funds sufficient to make annual interest and principal payments on county debt obligations borrowed for capital expenditures, largely highway and building projects. The county began borrowing for vehicle replacement in the 2022 budget. Also beginning in 2022, the Debt Service budget accounts for bond issuance costs (previously budgeted in the Capital Project Fund), which includes the cost of bond counsel, the county's financial advisor, and rating agency review. By statute, the county's outstanding debt is restricted to $5 \%$ of the equalized value of all property in the county.

## Policy

The county structures its debt borrowing issues to maintain annual debt service payments to avoid major fluctuations between years. Promissory notes are amortized integrating new debt with existing debt to achieve stability in annual payments and impact on future budgets. Larger payments are structured in later years to take advantage of call provisions when warranted by the market.

The county uses debt borrowing to fund no more than $80 \%$ of net (after revenues applied) capital budget expenditures for a moderate term no longer than ten years. This allows debt service to be managed to comprise no greater than $10 \%$ of total governmental operating expenditures over the long term. Capital projects include highway projects, county buildings, information technology projects, and projects at county parks and the airport.

The county also uses debt borrowing to purchase certain vehicles and equipment planned for in the Vehicle Replacement Plan Fund. Departmental contributions toward vehicle replacement will be used to fund principal payments on the related debt. Debt issued for vehicles will be conservatively paid back over seven-year terms (before the next replacement is needed), but will be structured within the same ten-year promissory notes issued for capital projects to avoid the need for separate debt issuances during the same year.

Based on the current five-year Capital Projects Plan, debt service expenditures are structured to be no greater than $10 \%$ of the estimated total governmental funds operating expenditures over the next five years. See "Debt Service Ratio" (two pages later).

## General Debt Service Fund

This fund includes general county debt obligations related to capital project and vehicle replacement expenditures for governmental fund operations.

(b) The 2024 budget includes fund balance from the following sources: Debt Service Fund balance of $\$ 460,875$ and General Fund balance of $\$ 100,000$, and Vehicle Replacement Plan departmental contributions of $\$ 850,000$.

## Program Highlights

Payments by bond issue indicate a rapid repayment of debt due to a policy of using moderate term (10 years) promissory notes amortized by integrating new debt with existing debt to achieve stability in annual payments and impact on future budgets. Larger payments are structured in later years to take advantage of call provisions of the market rates when warranted. It is the county's policy to maintain county infrastructure (roads, facilities, technology, and equipment) within established standards to avoid more costly replacement or liability risks. The county relies on using moderate term debt issues to finance these projects and continue to address infrastructure needs prudently.

Beginning in 2022, the county started using debt borrowing to purchase certain vehicles and equipment planned for in the Vehicle Replacement Plan (VRP) Fund. Borrowing for vehicle replacement makes up $\$ 3.8$ million of the $\$ 20.8$ million bond issue planned for 2024 , an increase of $\$ 1.3$ million. Departmental contributions toward vehicle replacement will be used to fund principal payments on the related debt. The first principal payment on this borrowing will mature in 2025. Borrowing for the capital plan increases $\$ 7.0$ million, from $\$ 10.0$ million in 2023 to $\$ 17.0$ million in 2024 , largely for higher construction costs for the courthouse renovation project (\#201705).

In 2024, debt service expenditures are projected to increase by $\$ 704,000$, and includes an increase in principal payments by $\$ 561,000$, largely due to the phasing in of newer VRP debt, which increases $\$ 400,000$ in 2024. Interest payable in 2024 for this bond issue is estimated at $\$ 416,000$ (including $\$ 76,000$ related to vehicle replacement). Overall budgeted interest expenses increase $\$ 93,000$, mostly due to the inclusion of debt for vehicle replacement and an increase in borrowing (mentioned above), partially offset by a lower assumed interest rate (4.0\% in 2024 versus 4.5\% budgeted in 2023).

Bond issuance costs include the cost of bond counsel, the county's financial advisor, and rating agency reviews, and are budgeted to increase \$50,000 related to the larger bond issue in 2024.

Debt Service is funded primarily with property tax levy, which is budgeted to increase by $\$ 304,000$ to $\$ 15,428,200$. Remaining revenues consist of fund balance of $\$ 1,410,900$, including Debt Service Fund balance of $\$ 460,900$, General Fund balance of $\$ 100,000$, and departmental contributions toward vehicle replacement principal payments of $\$ 850,000$.

General Fund Balance is reserved for the planned future use and phase-out in the Debt Service budget as follows: \$100,000 in 2024, and \$100,000 in 2025.

(a) Principal costs related to vehicle replacement are funded through contributions from the Vehicle Replacement Fund and are excluded from the chart.
(b) 2020 Refinancing Notes includes refinancing of $\$ 10.5$ million balance of 2011, 2012, and 2013 debt issues.

## Debt Service Ratio

Debt service as a percent of total governmental operating expenditures, excluding proprietary funds and capital project funds, is a measure of the debt service impact to operations. As a fixed cost, debt issues are structured to maintain debt service at less than $10 \%$ of the total governmental operating expenditures in future county budgets. Projected debt includes debt expected to be issued for capital projects in future years of the 2024-2028 Five-Year Capital Projects Plan and interest on vehicle and equipment replacements. Debt Service figures below exclude principal payments on vehicle and equipment replacement, which is funded through contributions from the Vehicle Replacement Fund. Most projected expenditures for governmental operations assume a 3.0\% annual growth rate after 2024.

## Debt Outstanding

Debt outstanding is the outstanding principal on general obligation bonds for which the county has pledged its full faith, credit, and unlimited taxing power.

*Interest assumption (true interest cost - TIC) for the 2024 issue is estimated at 4.0\%

Future debt service is projected based on capital expenditures planned for in the County's five-year capital plan. The chart below also includes the estimated cost of issuance (e.g., bond counsel, bond rating review) and interest on vehicle replacements. Principal costs related to vehicle replacement are funded through contributions from the Vehicle Replacement Fund and are excluded from the chart. Debt is managed to maintain debt service payments at less than $10 \%$ of each respective budget year governmental operating expenditures. (See Debt Service ratio earlier in this budget.)
