AGENDA

- 8:30 Welcome, introductions
- 8:45 Watersheds—what are they and what has been happening to them?
- 9:30 to 10:30 Dissolved Oxygen, Temperature and Turbidity
- 10:15 to Noon Biotic Index (critters)
- 12:00 to 12:45 Lunch Break (bring your own)
- 12:45 to 1:45 Measuring Flow and Habitat
- 1:45 to 2:15 What Does It All Mean?
- 2:15 to 2:30 Where We Go From Here!

Other details:

- Lunch: Bring your own--there is a refrigerator available. Water and soda will be provided.
- Hip boots/waders-If you do not have them, please give your boot size when you call to confirm your attendance so we will have them for you that day.
- Each team should bring a clipboard or binder and a calculator.
- Dress appropriately for the weather, as we will be in or near the creek for an extended period of time.
- Please bring your calendar—we will try to schedule site visits where I will plan to accompany you on your first monitoring outing.
- We strongly encourage everyone to work with at least one other person to do stream monitoring for safety reasons. Please consider who you can team up with and try to bring them along to the training.

****Please call Jayne at 896-8305 and confirm your attendance at this session.**** There is no charge for the training and equipment will be provided, but you need to call and confirm your attendance so that we have enough equipment and the right size boots for everyone.
