Fast forward your life and become a college student for a week! This exciting technology camp is guaranteed to challenge your mind, showcase your adventurous skills, and help you enjoy summer. Join 100 other Girl Scouts as you experience the wonderful world of technology and get a glimpse of college life.

Cutting Edge Technology

Major in technology and take cutting edge courses with real college professors. Alverno College is a premiere college for women that has a state-of-the-art computer center.

Master one of five technology tracks:

1. **CyberWEB** Create a website that is as unique as you.
2. **EXTREME CyberWEB** Alumni of *CyberChallenge* get the opportunity to “enter the matrix” of professional website development. *(First year participants who want to experience this track should contact the program manager for approval at (800)565-GIRL.)*
3. **CyberPIC** Bring out your inner artist as you learn tricks of the trade.
4. **CyberMAG** Take charge as you create your own magazine...from start to finish.
5. **CyberVIDEO** “And ACTION!” Never miss a cue as you shoot, edit, and create a digital video highlighting your awesome *CyberChallenge* experiences *(for ages 15-17 only)*.

College/ Dorm Life

Submerge yourself in real college life as you learn community living in Alverno College’s dorm rooms, eat meals in the cafeteria, visit the Alverno College Bookstore, and have fun taking part in many other wonderful extracurricular activities. Create your own sorority group with nine other girls that will be your sisterhood of friends throughout the week. This high-energy camp includes a mentor luncheon where you’ll meet and talk to professional women who use technology on a day-to-day basis. (Girls who wish to be buddies can fill out a Buddy Request form that will come in the application packet after registering for the event.)

Challenges

Minor in challenges as you become an exchange student for the morning and visit Alice Chester Center for an afternoon of adventure challenges, rock climbing, and a cookout dinner with s’mores by a campfire. Take student field trips in town to places that girls choose. Last year, girls enjoyed an afternoon of swimming, a trip to Rockwell Automation, a movie night, and talent show.

Staff

Our remarkable staff includes college students and educators who are compassionate, energetic, and fun. They go through intensive training in youth development, program activity skills and safety procedures to help serve as outstanding role models for your daughter. We use a selective hiring process to screen applicants, including background checks.

Graduation

After majoring in technology and minoring in challenges, celebrate your accomplishments on Friday evening with your family and friends. Showcase all of the hard work you put into your projects with a presentation and social gathering.

Registration deadline is June 27 or when the event is full. Use Event/Workshop Registration form on page 31. Complete sections A and C. Make sure to list one of the five technology tracks you want.

ALV1: Sunday, July 13- Friday, July 18, Alverno College, Milwaukee
