

CURRENT DRUG TRENDS

- Nicotine
- Cannabis
- Opioids

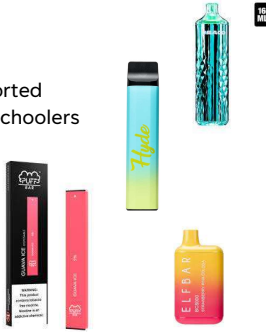

Jessica Brost, CHES
Community Educator and Program Specialist

1

VAPES

- 14.1% of high school students reported current e-cig use & 3% of middle schoolers in 2022
- Equivalent of 15-30+ cigarettes
- What is popular right now?
- Why is it bad for adolescents?

2

VAPE SENSORS

- Monitors air quality
- Can sense vapor from nicotine/THC vapor
- A way to regulate these behaviors inside of school

3

NICOTINE POUCHES

- New popular way of using nicotine
- High nicotine %
- Glorified on social media
- "Cheddar blasting"

4

CANNABIS

- 15% of adolescents reported using in the last month
- Adverse effects on adolescents' brains.
- Causes anxiety, paranoia, insomnia, appetite changes, dependence, etc.

5

CANNABIS CONCENTRATES

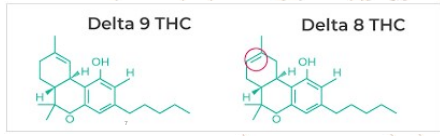

- Dab pen – discreet way of using cannabis
- Increasing concentrate = increasing dependence
- THC strips to test surfaces

6

DELTA 8 & OTHER ISOMERS

- Loophole through the Farm Bill that makes it legal.
- No laws or regulations on Delta 8 THC.
- It still is THC; you will feel psychoactive effects.
- Will test positive on a drug test.
- Sold in grocery stores, gas stations, vape shops

7

FENTANYL / LACED PILLS

- 107,622 Americans died of an overdose in 2021
 - 66% of those deaths are related to synthetic opioids
- Fentanyl is cut with pills, heroin, meth, cocaine, reports of THC
- May 2022 – Sept 2022, Enough fentanyl seized by the DEA to kill 36 million people
- Narcan, Narcan, Narcan

8

9

RECOMMENDATIONS

- Provide resources to students
- Offer support
- Prevention education
- Teach them ways to deal with stress before they turn to a substance
