

Onsite Resources & Facilities

Use of Bubblers & Water Fill Stations

- In order to mitigate the risk and reduce the spread of COVID 19 schools should prevent individual use of bubblers/water fountains. Students should be encouraged to bring their own water and can use water fill stations throughout the day.

Isolation and Health Rooms

- Schools will need to designate an isolation room at each school site where ill persons exhibiting COVID-19 symptoms can be triaged and isolated until they leave the building. Health room staff should utilize appropriate PPE.
