WAUKESHA COUNTY INTRODUCES NEW DASHBOARD TO FACILITATE DATA-DRIVEN DECISIONS FOR SCHOOL DISTRICTS

Update Provides Community Leaders and Residents with Enhanced COVID-19 Data

(WAUKESHA) –Today, Waukesha County Executive Paul Farrow unveiled a new COVID-19 dashboard to improve local school districts’ and residents’ ability to evaluate the pandemic’s impact on the community. The new dashboard streamlines how data is gathered, improves display features and readability, and provides new data points about the current status of COVID-19 in Waukesha County. The goal is to deliver the most relevant information to residents and decision makers in communities across the county.

“This new dashboard will improve business’, schools’ and residents’ ability to make informed decisions. Now, more than ever, we need current and accurate data if we are going to Stay Safe to Stay Open,” said County Executive Farrow. “As schools prepare to open this fall, it is vitally important this data is easily accessible to school administrators, teachers and parents.”

In addition to data and key metrics that have been available throughout the COVID-19 emergency response, the updated dashboard provides additional information on positive cases, school district case information, hospitalizations and data trends with active cases broken down by geographic locations. Over the past few months, the county has worked hard to streamline the process of gathering data and will continue to improve the dashboard.

The new dashboard and more information about Waukesha County’s response to the COVID-19 pandemic is available at www.waukeshacounty.gov/covid19.
