

Project Update: April 17, 2020

98409840

County Trunk Highway ES • National Avenue Fox River Bridge

Mukwonago / Vernon

Waukesha County is planning a rehabilitation of the County Trunk Highway ES bridge over the Fox River. It's about a half-mile east of CTH NN at the boundary between the Village of Mukwonago, Town of Mukwonago, and Town of Vernon. The bridge is a two-span structure with two travel lanes of traffic.

1. Full-depth **deck replacement** along each edge of the bridge
2. Placement of a **new concrete overlay** on the entire bridge deck
3. **Bridge railing** to be reset
4. **Bridge approaches** to be paved
5. New **approach guardrail** to be constructed.

Waukesha County bid this project in 2019; due to high cost, we did not award a construction contract. The project was re-bid in spring 2020. Construction is scheduled for mid-August and continue to Mid-November.

- The bridge will remain a two-lane bridge. [Deck width](#) will be same as the existing deck.
- **One travel lane will remain open** across the bridge; to allow this, the project will be constructed in stages.
- Users will encounter **temporary traffic signals** at each end of the project.
- Speed limit is reduced to 25 mph in the construction zone. Drivers should expect delay and are encouraged to seek alternate routes when possible.
- The bridge site's **canoe/boat access** to the Fox River will be closed during the project.
