

Project Summary – April 16, 2026

**CTH T (N. Grandview Blvd.)
Pewaukee River Tributary Structure
Waukesha County
Project I.D. 23-2770(15)**

Project Overview

The project is a structural lining of an existing steel culvert structure. The structure carries CTH T traffic over a tributary of the Pewaukee River. The site is located approximately 0.6 miles south of CTH SS at the northern entrance to GE Healthcare, located in the City of Waukesha and City of Pewaukee. The scope includes replacing structure headwalls and repairing a culvert adjacent to the highway.

The roadway and structure were initially constructed in 1973. The structure is a 10' x 7' corrugated steel structural plate arch. The lower portion of the culvert structure is deteriorating, resulting in the need to rehabilitate the structure.

The project will be constructed open to through traffic. The speed limit will be reduced through the work zone. Motorists should expect minor delays. The project is county funded. Construction is anticipated summer, 2026.

Project Schedule

Construction – Mid-June to mid-August 2026
