

Project Summary – April 15, 2025

CTH XX (Oakdale Drive)
Mill Brook Structure
Waukesha County
Project I.D. 24-2765(16)

Project Overview

The project site is located on CTH XX (Oakdale Drive) over Mill Brook, located approximately 0.6 miles north of Hi Lo Drive in the Village of Vernon. The proposed project is a replacement of the existing triple barrel culvert structure. Various structure types will be considered during design (pipe culverts, box culvert, clear span bridge structures). Structure headwalls will be replaced. The roadway over the structure will remain two lanes, but wider shoulders are anticipated. The structure may require new railing and guardrail. Some easements or land acquisition may be required to construct the project.

The structure was constructed in the 1960's. The existing steel culvert barrels are deteriorating. The stone headwalls are in poor condition. The guardrail at the site is sub-standard and in poor condition. For these reasons, complete replacement is warranted.

The structure will be closed to traffic during construction, with a posted detour. The project is county funded. Construction is currently anticipated for 2029, though construction year is subject to change.

Project Schedule

Design 2024-2025
Land Acquisition (if required) 2025-2026
Construction – Anticipated 2029
