

TRANSPORTATION SOLUTIONS SYMPOSIUM DISCUSSION QUESTIONS

1. General Reflections

What transportation barriers have you or your employees experienced?

Where do you see the most urgent needs for transportation support? (i.e. location, shifts/timing, sector, etc.)

2. Exploring Solutions

What solutions presented today resonated with the group? What other existing solutions could be considered?

Are these solutions ready to implement as-is, or does further collaboration need to occur to expand the audience or to modify the presented solutions?

3. Next Steps

What would a next-step look like and what support would you need to take that step?

- What does WOW Works need to do?
- What does local government need to do?
- What does business need to do?
- What do other stakeholders need to do?
