

## **Indoor Air Quality Testing at the Waukesha County Eble and Naga-Waukeee Ice Arenas**

---

Waukesha County's Eble and Naga-Waukeee Ice Arenas monitor indoor air quality using multiple methods to ensure the highest possible air quality.

Waukesha County has installed continuous monitoring devices at Naga-Waukeee Ice Arena and is in the process of completing the installation at Eble Ice Arena (anticipated completion 3/15/2011). These devices integrate with the arenas' ventilation systems providing for the highest possible air quality at all times.

As added assurance, both arenas' conduct tests using hand held devices. On a monthly basis, each rink is tested using a Nitrogen Dioxide and Carbon Monoxide tester. Readings are taken on the ice after completion of a resurfacing. These monthly tests are supplemented by additional hand held testing during ice maintenance activities, (e.g., use of gas edger).

Customer and employee safety have always been of the utmost importance. If you have additional questions or concerns, feel free to bring them to the attention of the Ice Arena Supervisors.
