Dear Mr. Todd:

The State of Wisconsin divides the jurisdiction for sites contaminated by petroleum storage tank systems between the Department of Natural Resources (DNR) and the Department of Safety and Professional Services (DSPS). This is based on statutory definitions of high, medium and low risk sites. Under this statute, oversight of sites falling under the definition of "low or medium risk" is the responsibility of the DSPS rather than our agency.

The DNR - Remediation and Redevelopment Program, has recently reviewed correspondence regarding the above-referenced case. We have determined that your site should be classified as "low or medium risk." As such, further reviews of submittals and all technical assistance will need to be provided by staff at the DSPS. The case files for this site are being transferred to:

Shawn Wenzel
WI Dept of Safety and Professional Services
2514 Morse St
Janesville, WI 53545-0249
(608) 758-4934
shawn.wenzel@wisconsin.gov

Please address all future inquiries to the DSPS. If you have questions or concerns, you can contact me at 414-263-8680.

Sincerely,

David Hanson
Environmental Program Associate
Remediation and Redevelopment Program
