WE CAN HELP YOU

**WITH YOUR
VETERANS' BENEFITS**

The Waukesha County Veterans' Services provides assistance to Waukesha County veterans and their families in obtaining federal and state veterans' entitlements.

We can help you discover the benefits to which you are entitled and assist you with the application process.

There is no fee for our services.

Conditions Currently Recognized by VA as Related to Southwest Asia, Iraq & Afghanistan Service

◆ **Brucellosis**

A bacterial disease with symptoms such as profuse sweating and joint and muscle pain. The illness may be chronic and persist for years. It must be at least 10% disabling within 1 year from the date of military separation.

◆ **Campylobacter Jejuni**

A disease with symptoms such as abdominal pain, diarrhea, and fever. It must be at least 10% disabling within 1 year from the date of military separation.

◆ **Coxiella Burnetii (Q Fever)**

A bacterial disease with symptoms such as fever, severe headache, and gastrointestinal problems such as nausea and diarrhea. In chronic cases, the illness may cause inflammation of the heart. It must be at least 10% disabling within 1 year from the date of military separation.

◆ **Malaria**

An infectious disease caused by a parasite. Symptoms include chills, fever, and sweats. It must be at least 10% disabling within 1 year from the date of military separation or at a time when standard or accepted treatises indicate that the incubation period began during a qualifying period of military service.

◆ **Mycobacterium Tuberculosis**

An illness that primarily affects the lungs and causes symptoms such as chest pain, persistent cough (sometimes bloody), weight loss and fever.

◆ **Nontyphoid Salmonella**

A condition characterized by symptoms such as nausea, vomiting, and diarrhea. It must be at least 10% disabling within 1 year from the date of military separation.

◆ **Shigella**

A condition characterized by symptoms such as fever, nausea, vomiting, and diarrhea. It must be at least 10% disabling within 1 year from the date of military separation.

◆ **Visceral Leshmaniasis**

A parasitic disease characterized by symptoms such as fever, weight loss, enlargement of the spleen and liver, and anemia. The condition may be fatal if left untreated.

◆ **West Nile Virus**

A disease spread by mosquitoes characterized by symptoms such as fever, headache, muscle pain or weakness, nausea, and vomiting. Symptoms may range from mild to severe. It must be at least 10% disabling within 1 year from the date of military separation.

Final Regulation on Infectious Diseases Related to Service in Gulf War, Iraq & Afghanistan:

On September 29, 2010, VA published the final regulation establishing nine infectious diseases as related to military service in Southwest Asia beginning with the first Gulf War on August 2, 1990 through the conflict in Iraq and starting September 19, 2001 in Afghanistan. Eligible Veterans may receive health care and disability compensation for these diseases.
